

# LAYFLAT HOSE FITTING SYSTEM

- \* The Three segment clamp is a secure fitting method for attaching a coupling to a layflat hose. This non-corrosive clamp is made of three aluminium segments which are fixed with Bolts.
- \* The **NewAge** has engineered to accommodate layflat hose at every stage of life. The unique mating sections of the segment joins to prevent potential leakage after refitting.
- \* When clamped over a **NewAge** coupling tail designed with advanced manufacturing technology, fitting system is foolproof. A location rib ensures correct positioning of the clamp, thereby making fitting layflat hoses easy on-site and dependable.
